# A New Perspective

The Perspective offers all the comfort of a large RV in a compact, ingenious format. Offering you a brilliant combination of European design, North American technology and superior manufacturing quality.

The Perspective's layout on the Ford Transit platform offers a spacious interior, thanks to its 6'5" height. This allows even tall people to move around the vehicle with ease. The 360° panoramic windows offer increased light and an exceptional view, creating a greater proximity with nature. In addition to all this natural light, the dining area at the front provides an incomparable sense of spaciousness and freedom.

A wider field of vision reduces blind spots, making driving even safer and more enjoyable.

Our forward-thinking vision of ergonomics enhances every aspect of the design that led to the creation of the Perspective.

From the configuration of the kitchen cabinet, the dining area at the front, to the concept of a permanent fold-up bed at the rear, each element is designed to maximize the limited space of a compact vehicle and redefine the standards of comfort on every outing.

Two configurations are available for the permanent rear-folding bed. An extra-large longitudinal bed measuring 6'5" long and 68" wide provides a comfortable and restful sleep. A configuration with two twin beds is also available, making it easier to get in and out of the bed. In this configuration, the driver's side bed is 6'5" long and the passenger side bed is 6', both are 30" wide.

The new Truma Combi-G system, powered by gasoline and electricity, combines heating and water heating in a single powerful and quiet unit, ideal for 4-season use. In warmer weather, the Truma Aventa air conditioner provides unrivalled comfort, even when completely autonomous. These systems redefine the standards of high performance and autonomy in the most remote locations.

The kitchen area is designed to satisfy the most demanding chefs, with a large capacity refrigerator, a double induction stove and a deep sink integrated into the refined, functional countertop. Work surfaces and ample storage space create an ergonomic environment designed to inspire your greatest culinary creations.

# A Reimagined Interior

Thanks to a great deal of ingenuity, we've reinvented the bathroom space with roll-down doors that unfold to offer maximum privacy, without wasting space. The result is a spacious bathroom complete with porcelain toilet, thermostatic shower faucet and a functional space that give luxury cars a run for their money.

## Enhanced off-the-grid capabilities

We build each vehicle with a vision of autonomy, because we love freedom and know that it's what allows you to go further and realize your dreams.

Our vehicles are equipped with solar panels, high-efficiency lithium batteries and powerful inverters, enabling both novices and the most demanding to escape in complete tranquility.

Our advanced electrical systems, combined with large fuel tanks also enable you to achieve autonomy with no limits other than those of your imagination.

# Excellence in RV Manufacturing

## Made for Enthusiasts by Enthusiasts

Our attention to every detail at every step of the manufacturing process reflects our intention to provide a superior product and an unparalleled experience. Our passion is visible both in the choice of our components and on the faces of the people who assemble them.

Turn your dream into reality...
