Night floor plan

The Panoramic G offers all the comfort of a large RV in a compact, easy-to-drive vehicle. Offering you a brilliant combination of European design, North American technology and manufacturing excellence.

A Panoramic view

The oversized windows around the entire vehicle create a panoramic view that provides a true sense of being in nature. In addition to the amount of light allowed into the Panoramic G, the dining area now gives a feeling of freedom similar to much bigger Class A RVs. The incomparable views extend to each area of the Panoramic G, providing a better field of vision and greater visibility while driving.

Whether it's the configuration of the kitchen cabinets, the dining area at the front or the modular bed concept at the rear, our advanced vision of ergonomics highlights each aspect of the design that gave birth to the Panoramic G. All the details are taken into account to maximize the limited space of a compact vehicle and redefine the comfort standards of each trip.

The combination of the front lounge with the permanent modular bed at the rear eliminates the gymnastics routine of assembling the bed every morning and every night. The Panoramic G smart design also offers the most comfortable mattress and the largest cargo capacity in the industry.

The brilliant use of space in the kitchen clearly shows that bigger doesn't always mean better. A full-height refrigerator, dual induction cooktop, stainless-steel sink and a magnificent extended counter provide a true cooking experience worthy of a chef. The large storage spaces and vertical food pantry also create a more ergonomic workspace that unleashes inspiration and creation.

A reimagined interior

Thanks to a lot of ingenuity, we reinvented the space with sliding drum doors to offer maximum privacy without obstructing the walking space in the vehicle. We created a shower room that offers unparalleled comfort and luxury with a porcelain toilet, a thermostatic shower valve and a functional space up to a larger motorhome owner's expectations.

Enhanced off-the-grid capabilities

We build each Class B recreational vehicle with a vision of autonomy; we love freedom, and we know what it means to go further to achieve your dreams. The Panoramic G is equipped with solar panels, power inverters and high-efficiency Lithium batteries, in addition to automatic electrical management systems.

The use of a gasoline-powered heating system and the well-balanced size of our fuel tanks allow for autonomy with no limits other than those of your imagination.

Excellence in RV Manufacturing

Made for Enthusiasts by Enthusiasts

Our attention to every detail at every step of the manufacturing process reflects our intention to provide a superior product and an unparalleled experience. Our passion is visible both in the choice of our components and on the faces of the people who assemble them.

Turn your dream into reality...
